

360° ANALYSIS

How To Detect Your Real PLM Needs Well in Advance...

OFFER

For all customers with a KEONYS support contract, we offer you the possibility to be assisted by a «Technical Referent». This expert will be your privileged contact throughout the duration of your support contract.

Your referent will begin his support with a one-day audit on your premises, in order to:

- Understand your use of Dassault Systèmes' products
- Identify any needs expressed by your employees

At the end of this audit, your Technical Referent will deliver you:

- A summary of your current working methods
- Improvement proposals (training, coaching, version updates, new methodologies,...)
- Suggestion of an implementation roadmap
- A quarterly review can also be set up to monitor your actions.

DOMAINS

This offer is aimed at different environments:

- Application domains: CATIA, SIMULIA, CATIA Composer, DELMIA, ENOVIA
- Company fields: Design offices, Methods offices, Calculation offices, Design offices, Technical documents, IT (Infrastructure),...

*Option can be combined with the offer SERVICE CONTRACT

BENEFITS

- Improvement levers for your productivity, quality, and design cycle:
 - Advising a solution fitting your needs and evaluating the associated gains
 - Optimization of existing methodologies
- Suggestion of new working methods
- A special relationship with :
 - KEONYS and your Technical Referent
 - The editor Dassault Systèmes
- Personalized technical follow-up of your site

«In order to support you in your daily projects, we have developed the 360° ANALYSIS consulting offer, in addition to our new support offer.

This option takes into account the operational needs of your organizations and the strategic issues of your management.

It is provided with the support of a KEONYS engineer, your «Technical Referent», who will bring an added value to the analysis of your methodologies.»

Sabrina LEGUE
Customers Support Manager, KEONYS
