

# How To Optimize Your Different CAD Applications and Their Environment...

## OFFER

This offer, deployed by CENIT, is an interface that enables standardized management and use of the various CAD applications and their related environments.

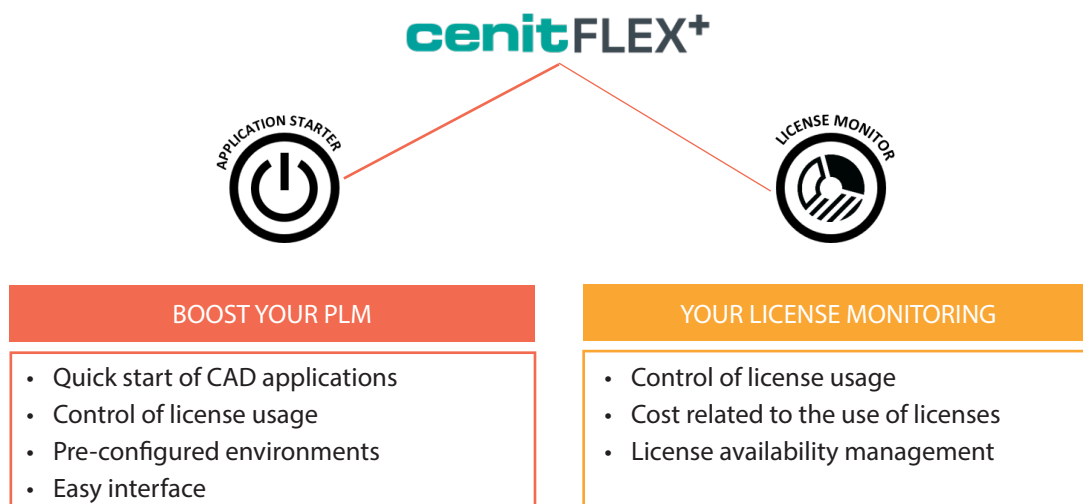

Environments are pre-configured and standardized to ensure maximum compliance with the requirements of your environment.

For which benefits?

- A single interface for all your CAD applications
- A simple, consistent and intuitive tool
- Standardized, efficient and secure management of complex environments
- A flexible and easily customizable user groups licensing system
- A dynamic directory for user management

## BENEFITS

- Time saving with fast license availability
- Improved productivity through reduced error rates in CAD environments
- Cost reduction for IT support with the GoOffline function
- Improved responsiveness for CAD tool update management through the use of standardized OEM environments
- Greater legal certainty when using your licences thanks to quota allocation
- Reduced risk of errors in CAD infrastructures through standardization

\* Cumulable with support offers  
GENERAL AGREEMENT or CONTRACT SERVICE
